RADIO CONTROL TRACTOR TRUCKS

56326 40-Foot Container Semi-Trailer for Tamiya 1/14 R/C Tractor Truck

Availability: May'11

Quantity Per Carton: 1 unit

Image is computer generated .

Cargo containers are used for shipping products and raw materials all around the world and ISO containers, which are designed under ISO specifications, are most common for international shipping. Among the ISO containers, there are 3 major variants: 20ft. (6.096m) container, 40ft. (12.192m) container (with regular height: 8'6"=2.591m), and 40ft. high-cube containers (height: 9'6"=2.896m). Tamiya is proud to announce the release of this new semi-trailer with a 40ft. regular height container which can be connected to any Tamiya's 1/14 scale Tractor Trucks.

About the Item

- The container features the same gray livery as that of the shipping company MAERSK.
- Length: 917mm, Width: 188mm, Height: 300mm.
- Container side, top, and front panels feature different panel patterns which are accurately reproduced.
- The model features the same twist-lock system as the actual container to enable attachment/detachment from the trailer.
- 3-axle semi-trailer designed for loading one 40ft. or two 20ft. containers, which is most commonly seen in Europe and is realistically reproduced and provides a great scale presence.
- Container x1pc.
- Semi-Trailer x1pc.
- Can be connected to any Tamiya 1/14 scale Tractor Truck.
- Further customize your semi-trailer and container with the following Trailer Truck Option Parts:
 - Item 56502 Semi-Trailer Light Set
 - Item 56503 Tractor Truck Oil Shocks (1 Pair)
 - Item 56505 Motorized Support Legs
 - Item 56512 Twin-Spoke Front Aluminum Wheels (2pcs.)
 - Item 56513 Twin-Spoke Rear Aluminum Wheels (2pcs.)

58478 1/10 R/C 4WD Nissan 370Z (TT-01 Type-E Chassis)

Availability: April'11

Quantity Per Carton: 6 units

Image shows prototype

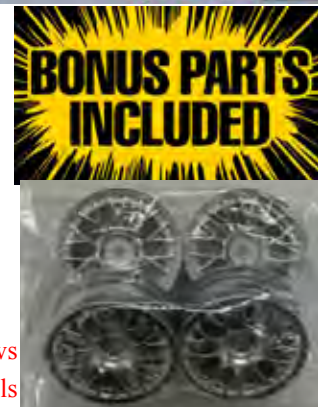

Image shows chrome plated wheels

The Nissan Z is one of Japan's representative sports cars and the 6th generation was released in December 2008. Although the wheelbase was shortened by 100mm from the previous model, the car's long-nose, short-deck design was kept and the fenders were pushed out to create its muscular, athletic look. The car is powered by a 3.7 liter DOHC V6 engine, and the 6-speed manual transmission version has the world's first SynchroRev Match system which can adjust the engine's RPM during downshifts for a smooth heel-and-toe effect, making it more enjoyable to drive. In pursuit of "pleasurable driving," this 6th generation Z has undergone countless tests in order to sharpen its performance and will garner the admiration of sports car fans around the world.

About the Item

- This is a 1/10 R/C assembly model kit.
- Kit includes **FREE BONUS PARTS** (Chrome Metal Plated Wheels) which are for **EXPORT ONLY** and are subject to your **FIRST ORDER**.
- The polycarbonate body depicts the muscular form of the 370Z.
- Length: 451mm, Width: 188mm, Height: 130mm, Normal Wheelbase: 257mm.
- 26mm width wheels and tires with tread pattern included.
- Based on the fun to drive TT-01 Type-E Chassis for effortless assembly.
- 4WD shaft driven bathtub chassis with 4-wheel independent double wishbone suspension and sealed front and rear differential gearboxes.
- LEDs to depict headlights (white) and taillights (red) are included.

58484 1/10 R/C Weider HSV-010 (TA05 ver.II Chassis)

Availability: April'11

Quantity Per Carton: 4 units

Image shows actual vehicle

Team Weider is another Super GT team that drove the impressive Honda HSV-010 for the 2010 season. At the season's opening race, the Team Weider's HSV-010 sensationally won pole position immediately stating its intentions for the championship. At the 2nd round Okayama GT 300km race, the HSV-010 won pole position again and went on to win the race. Other strong performances including a 3rd place finish at the 4th Round Sepang, a 2nd place finish at the 5th Round Sugo set up an exciting championship deciding final 8th Round at Motegi. After winning pole position for a third time, the race saw the Team Weider HSV-010 battle hard with the Lexus Team Petronas Tom's machine for the win. Although narrowly missing out on the victory, the 2nd place finish was enough for the team to be crowned the 2010 Super GT 500 Class championship winning car.

About the Model

- This is a 1/10 scale R/C assembly model.
- The polycarbonate body accurately captures the sleek form of the Honda.
- Medium-narrow racing slick tires and medium-narrow 6-spoke wheels (offset +2) included.
- Separately molded metal plated light cases included.
- Side mirrors and rear wing are accurately reproduced with separately molded parts.
- 2-belt driven TA05 ver.II chassis offers superior control, handling, and easier maintenance.

58489 1/10 R/C Avante (2011) (Tentative)

Availability: March '11

Quantity Per Carton: 2 units

Images show 1988 original item and packaging.

In March 1988, Tamiya released a pure racing buggy called the "Avante." It featured highly sophisticated design including a shaft-driven 4WD setup, longitudinal motor & battery positions, differentials equipped with 3 small planetary gears, a FRP double deck chassis layout, as well as a formula-type body and chassis fairing. It was equipped with innovative components such as fully adjustable suspension and cam-lock wheel caps. Tamiya is proud to announce the re-release of this legendary racing buggy which incorporates modern improvements while keeping true to the original.

About the Model

-This is a 1/10 R/C assembly kit model.

-While maintaining the basic layout of the original, this re-released version has been thoroughly updated with new materials in order to meet modern R/C requirements.

-Main Chassis Frame: 1988 original featured FRP upper/lower decks while this re-release version is equipped with carbon-fiber upper/lower decks. Also features front/rear carbon-fiber damper stays.

-Front Knuckles: The original resin front knuckles have been replaced with aluminum parts for increased rigidity. Oil damper cylinders feature bottom caps for easier maintenance.

-Motor: Kit includes an exclusive motor which features gold coloring as seen mounted on the original Avante (under development).

Package: Package features the same design and dimensions as the original. Blister packs are also reproduced just like the original.

GRADE UP PARTS FOR RADIO CONTROL

54276 TRF201 Aluminum Motor Plate

Availability: March'11

Order Unit: 5 units

Images show CAD data

About the Item

- Compared with the normal motor plate (19.8g), this newly designed high-performance (7075) motor plate (17.3g) will provide your machine with a 2.5g weight saving.
- The upper part of the motor plate features a new design which provides the weight saving and helps improve center of gravity.
- The thickness of the motor attachment area is now 3.2mm to provide the strength required for tough off-road driving and jump landings.
- This blue anodized motor plate also looks good as a dress-up part.
- The motor plate's outer surface features a protrusion to allow for an improved attachment with the motor cover and protection against dust.

OPTIONS PARTS FOR RADIO CONTROL **54277 M-Chassis Reinforced Gear Set**

Availability: April'11
Order Unit: 5 units

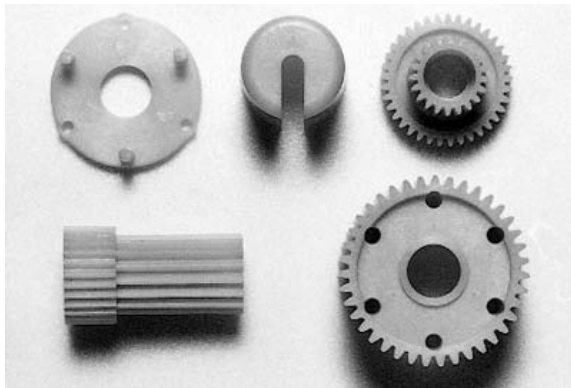

Image shows prototype

About the Item

- Reinforced Gear Set (black) x 1
- This reinforced gear set will extend the maintenance cycle.
- Can be used with M-03, M-04, M-05, and M-06 chassis machines.

54278 F104 Separated Upper Deck

Availability: April'11
Order Unit: 5 units

Image shows prototype

Further customize your F104 chassis machine with this Separated Upper Deck set. This two-piece upper deck reduces chassis rigidity and improves flexibility to provide your machine with greater ground traction while cornering. This part will allow you to further fine-tune your F104 chassis according to the track layout and surfaces you are racing on.

54295 M-06 Stabilizer Set

Availability: May'11

Order Unit: 5 units

RC M06

Image shows CAD data of front stabilizer.

Further customize your M-06 machine with this Stabilizer Set. Once installed, they will provide your machine with a more stable cornering action.

About the Item

- Front Stabilizer Rod: Soft (Black) x 1pc, Hard (Silver) x 1pc.
- Rear Stabilizer Rod: Soft (Black) x 1pc, Hard (Silver) x 1pc.
- 3x3mm Grub screw x 9pcs.
- 3x23mm Turnbuckle shaft x 2pcs.
- 5mm Adjuster S x 1pc.
- 5mm Adjuster x 6pcs.
- 3x8mm screw x 2pcs.
- 5mm Ball connector (Black) x 2pcs.
- Ball collar x 2pcs.
- Aluminum stabilizer end x 4pcs.
- 3x25mm screw x 2pcs.
- Stabilizer stopper x 1pc.

54296 M-06 3x34mm Ti-Coated Ball-Head Suspension Shaft (2pcs.)

Availability: May'11

Order Unit: 5 units

RC M06

Image shows CAD data.

Thanks to their titanium coating, the surface hardness of these suspension shafts has improved and also provides greater resistance against scratches caused by dust and sand.

Item Contents

- 3x34mm Titanium coated shaft x 2pcs. (New design)
- 2mm E-Ring x 2pcs.
- These shafts come produced with a top class gold titanium color.
- These shafts are to be used to replace the rear lower arm 3x34mm ball-head suspension shafts of the M-06 PRO Chassis Kit and the 3x32 screw pins of M-06 chassis machines.
- *These shafts also allow attachment of Item 54000 M-Chassis Aluminum Damper Set for a wider setting. Attachment of the kit included friction dampers is not possible.
